"The Power Of Forex: Leverage"

From the Desk of: Bill Byron - Denver, Colorado
28 March 2007

Welcome to the incredible world of "FOREX", also known as the Foreign Exchange Trading Market, or sometimes referred to as Currency Trading. Forex is the global spot (cash) market for currency worldwide.

This short report will provide you with the information you require to make an intelligent decision about your financial goals and if creating income with Forex is right for you. Read on, then watch a short movie

There's nothing like tapping into a market that previously was known only by large financial institutions, banks and a select group of sophisticated individuals. This financial wealth creation secret has been exposed! Through your personal computer via the internet, some trading software, and the click of a mouse, you can control your financial destiny and create your financial future on your terms.

Forex trading is different from the futures market, where you buy a contract to purchase a particular currency at a future price in time. Trading in Forex is also much less risky than trading currencies on the futures market, much more profitable, and a lot easier than trading stocks, bonds and other equities.

Although the name FOREX may be a new concept to you, FX trading is the hottest and newest method to create wealth in the global financial arena, and is fast becoming a career alternative for many individuals due to the flexible hours, the ability to work from home, and the potential to create an extremely high income. The flexibility of 24 hour access and the quick, real time trades make online currency trading an ideal home based business opportunity and another vehicle to create, manage and diversify your wealth.

With proper training and diligence, anyone can begin with a very low investment, and even with limited time, can create massive income. Another appeal is the portability – this is a business you can take with you – anywhere. All that is required is your laptop and an internet connection!

FOREX is the world's largest and most liquid financial marketplace. With a trading volume of nearly \$1.9 trillion dollars a day, no single group can control the market for an extended period of time or manipulate... and there are no insider trading or secrets. It is a level playing field.

This compares to a trading value in the world's stocks or equities market arena of approximately \$40 billion daily, or the \$15 billion in the world's futures markets. The FOREX market is the most liquid in the world. With the sheer volume and big numbers, it becomes quickly apparent that Forex gives you, and millions of other FOREX traders, almost infinite trading liquidity and flexibility.

You will learn to love the word **LEVERAGE**! Forex offers up to 100:1 leverage. Stocks offer 1:1 or 2:1 and Futures offer up to 15:1 leverage. It doesn't get any better than this: in Forex, your \$100 is worth \$10,000.00. **YOU** are in control of \$10,000.00 with your \$100 investment and you decide when to make your move.

Example: the exchange rate goes from 1.25 to 1.30 in a EURO vs US Dollar trade, that's a .05 cent increase in the value of the EURO.
Your \$100 investment is now worth \$500.00!

This can happen every day in the world of Forex. That's the Power of Leverage.

You will trade commission free in over 60 currencies, and you can benefit from these currencies whether the market is going up or down, or profit from both at the same time. FOREX markets trade 24hours a day following the sun around the globe. There is no waiting for the opening bell.

Learning Forex is easy. Get started trading with only \$300 of capital and there is no credit check. Best of all, you can gain experience without risking your own money by using a free demo account. Discover this lucrative and exciting world of Forex.

BUT HOW? You might be thinking...

Learn the secrets with our Exclusive, proprietary online EPI video training, "The Power Of Forex". The Ultimate Forex Training. Master the art of Forex currency trading and you'll never have to work again.
